

vBoosterStateMachineInit
_CMockExpect

vBoosterStateMachineInit
_CMockExpectWithArray

CMockExpectParameters
_vBoosterStateMachineInit

```
graph LR; A["vBoosterStateMachineInit  
_CMockExpect"] --> C["CMockExpectParameters  
_vBoosterStateMachineInit"]; B["vBoosterStateMachineInit  
_CMockExpectWithArray"] --> C;
```

The diagram illustrates a mapping or dependency between two source functions and a target function. On the left, there are two white rectangular boxes. The top box contains the text 'vBoosterStateMachineInit' followed by '_CMockExpect' on a new line. The bottom box contains the text 'vBoosterStateMachineInit' followed by '_CMockExpectWithArray' on a new line. On the right, there is a gray rectangular box containing the text 'CMockExpectParameters' followed by '_vBoosterStateMachineInit' on a new line. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both source functions are related to or mapped to the target function.
